Keywords: System sales promotion, Salary administrasion

**Abstract:**

CV. PANELI which has a payroll administration system which has counted SPG and has been determined with a basic salary and money crafting each SPG, overtime pay and meal allowance per day each SPG. The calculations are, the meal allowance is calculated from the number of incoming SPG employment multiplied by the amount of money that has been determined each day, as well as overtime pay that has been determined. Calculation of turnover of goods and bonuses are calculated from the total turnover per month multiplied by the specified percentage divided by two people. It calculations by using a computer in order to make the payroll and reports a fast, accurate and precise. And besides it is useful to improve performance in data processing personnel and the information quickly, precisely and accurate so that it can assist in the CV. PANELI.
